SUMMARY

I am a dynamic and detail-oriented Android Application Developer with 6 months of experience in mobile development. Specializing in Kotlin and Jetpack Compose, I create highly responsive user interfaces and integrate backend solutions such as REST APIs and Room Database. I am eager to contribute my skills to building innovative mobile applications that meet user needs

PROJECTS

Medical App (B2B) | Medical Admin | Medical User

11/2024 - 01/2025

<https://www.linkedin.com/feed/update/urn:li:activity:7282778559658512384/>

Kotlin, Jetpack compose, REST APIs, Retrofit, Room, DI

- Developed a Medical app using Kotlin and Jetpack Compose, offering a clean and user-friendly interface.
- Flask API project designed for managing users . The API provides endpoints for various CRUD (Create, Read, Update, Delete) operations, allowing users to interact with the...
- Implemented mailti-vendor functionality to connect patients with multiple healthcare providers and services.
- Used Retrofit and REST APIs for seamless data exchange and real-time updates in the app

BookNest

01/2025 - 01/2025

<https://github.com/ArbabShaikh99/EBook>

Developed BookNest, an Android app for book enthusiasts, enabling users to read and download PDF books with a secure, intuitive, and user-friendly interface.

- Firestore Integration: Benefit from secure user authentication and a robust cloud-based database for managing book collections.
- MVVM Architecture: Maintains a clean, organized, and scalable codebase for better performance and development efficiency.
- PDF Reader: Immerse yourself in a smooth and engaging reading experience for all your favorite PDF books.
- Jetpack Compose: Enjoy a modern and responsive user interface built using the latest Android UI toolkit.

Contact Keeper App

08/2024 - 09/2024

This app is designed to make managing your contacts easier and more efficient.

- Room Database: Uses Room database for local storage of contacts.
- Add Contacts: Add new contacts with name, phone number, email, and profile photo.

SKILLS

Android Development

Kotlin Jetpack Compose Firebase

Real Time Firebase Coroutines

Restful APIs Clean Architecture

Room Database MVVM MySQL

Dependency Injection (Dagger Hilt)

State Management in Compose

Android SDK Retrofit

EDUCATION

Bachelor in Computer Science - BSCS

Mehran University of Engineering and Technology

01/2023 - 10/2026 Hyderabad District

TRAINING / COURSES

Android App Development using Kotlin

- Completed in 5-month certification in Android App Development using Kotlin, focusing on mobile app development.
- Learned to build modern Android appa using Kotlin, Jetpack Compose, and MVVM architecture.
- Gained expertise in integrating REST APIs, Retrofit, and Dependency Injection (DI) for efficient app functionality.
